Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims 27-40 drawn to an invention nonelected with traverse in Paper dated 13 November 2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Bentley et a. '234.

There is disclosed in Bentley a cartridge containing one or more liquid beverage ingredients (para. 29, lines 5-8) and being made from substantially air and water impermeable materials (plastic), the cartridge comprising an inlet 26 for the introduction of hot water into the cartridge, a compartment containing the liquid beverage ingredients and an outlet 37 for a beverage produced by dilution of the liquid beverage ingredients by the hot water, the compartment having a means (partition portions 29 and slots 28) for controlling dilution of a proportion of the liquid beverage ingredients on introduction of the hot water into the compartment. The controlling means allowing the flow path of the hot water to be broken into several sections, thus only allowing portions of the flow

Art Unit: 1761

path to reach the compartment, as opposed to having the entire flow of hot water dilute the entire liquid beverage ingredients at one time.

Allowable Subject Matter

Claims 1, 7-26 and 43-51 are allowed.

Response to Arguments

Applicant's arguments filed 13 February 2007 have been fully considered but they are not persuasive. Applicant argues that due to the location of the castellations and slots, with respect to the ingredient compartment, such would not hinder entry of the beverage ingredients into any flow path between the inlet and outlet. It is the position of Examiner that since the castellations surround the ingredient compartment, they could function as a partition which would hinder the entry of beverage ingredients.
